## WHY USE THE RAILWAY AS THE MAIN MODE OF INTERMODAL TRANSPORT?

It helps the environmental sustainability of the planet, because of its lower impact compared with other modes of transport:

- ✓ Lower CO2 emissions per unit transported.
- ✓ Lower acoustic emission per unit transported.
- ✓ Lower energy consumption per unit transported.
- ✓ Lower risk of accidents per unit transported.
- ✓ It helps prevent congestion around large urban areas.

We are at your disposal for any inquiries or requests, answering them as soon as possible (\*)
